

The background features several large, organic, hand-drawn shapes in shades of orange, terracotta, and muted green. Interspersed among these shapes are several sets of thin, black, wavy horizontal lines. At the bottom center, there is a small white circle containing a black downward-pointing chevron.

Argentine Citrus Federation.

Federcitrus was founded in 1983 and is based in the city of Buenos Aires. It's mision is to provide solutions that accompany the growth of the activity citrus economy in Argentina.

Our associates export 95% of fresh citrus fruits and their derivatives to the most diverse overseas markets on the 5 continents.

Argentina has two regions marked by their specially and benefits. The Northeast [NE] offers the largest variety of sweet citrus from the provinces of Misiones, Corrientes, Entre Ríos and the north of Buenos Aires. The Northwest region [NW] is characterized by being the cluster of lemons of the Southern hemisphere, it includes the provinces of Tucuman, Salta, Catamarca and Jujuy.

All the activity in its different facets employs 110,000 of people, being one of the main regional economies for these provinces. The richness of soils and climates together with continuous updating of varieties, the sustainable use of water, technological innovation and world indices lower use of agrochemicals, make the supply of argentinian products can adapt to the most demanding markets of the world. The argentine citrus due to it's high quality, excellent appearence and colour, it provides the balanced combination os sweetness and acidity, being the most sought after value in the world.

Argentine citrus exports have a traceability system [SITC] that guarantees that the fresh fruit produced complies with the regulations Phytosanitary of the markets. The system monitors production in successive stages: cultivation, packing plants and port departure, making Argentinean fruit citrus fully complies with international standards and requirements.
